

Web slings and synthetic round slings are available for a range of load capacities and in different lengths.

The web slings are made of polyester and are available either open ended or as an endless sling.

The round slings with a carrying capacity of 1 - 8 tonnes are made of high-strength polyester yarns shielded with a highly robust, seamlessly meshed and impregnated two-layer protective sheath. Upwards of a carrying capacity of 10 tonnes, the high-strength polyester yarns are shielded with a seamlessly meshed and impregnated single-layer protective sheath.

Lifting slings and round slings are available in a wide range of lengths. Please quote the required length when placing your order.

Web slings and round slings are colour-coded according to load capacity.

Load capacity: 70 t max., greater load capacities available on request. Edge protection must be ordered separately.

Web slings		
Load capacity in t	Ply qty.	Web width in mm
2	2	50
3	2	80
5	2	100
8	2	240
10	2	300
12	4	180
12	2	300
16	2	300
25	4	300

Synthetic round slings	
Load capacity in t	Colour
1	Violet
1.5	Dark green
2	Light green
3	Yellow
4	Grey
