

A key feature of Tirak wire rope hoists for man riding applications is their reliability. Their compact and light-weight design makes them the hoist of choice for applications in tight spaces. Tirak wire rope hoists are mobile, electrically powered hoists for man riding applications. The length of the wire rope, and thus hoisting height is virtually unlimited.

The rope hoist is supplied with a remote control, 60 metres of wire rope and a 1-tonne deflection roller.

A separate fall-prevention device is required with this hoist.

Load capacity: max. 500 kg

With sheave blocks: 1,000 kg

Tirak passenger wire rope hoist							
Load capacity in kg	Wire rope speed in m/min	Operating voltage	Recommended wire rope diameter	Capacity in kW	Rated current in A	Noise development in dB	Weight in kg
500	9	400 V	8	0,9	3	max. 72	44
